LISTING OF CLAIMS

1. **(Currently Amended)** A computer implemented method, comprising the steps of:
displaying a summary view of one or more documents to a user;
enabling the user to select one or more of the one or more documents listed in the summary view;
receiving ~~an indication~~ instructions from the user ~~that the user desires to have the computer~~ to create a list of the one or more selected documents selected by the user and to store the list in a system clipboard; and
creating a the list of the one or more selected documents and storing the list in the system clipboard in response to receiving the ~~indication~~ instructions from the user, wherein
for each of the one or more selected documents ~~document selected by the user~~, the list includes document summary data pertaining to the selected document and a hyperlink to the selected document.
2. **(Currently Amended)** The method of claim 1, wherein the document summary data pertaining to a the selected document and the hyperlink to the selected document are combined so that the user can click on the document summary data itself to activate the hyperlink.
3. **(Original)** The method of claim 1, wherein the one or more documents are electronic mail messages.
4. **(Original)** The method of claim 1, wherein the one or more documents are documents that were found by an Internet search engine.
5. **(Original)** The method of claim 1, wherein the one or more documents are messages that are included in a discussion thread.

6. **(Currently Amended)** The method of claim 1, wherein the step of enabling the user to select one or more of the one or more documents comprises the step of displaying a check-box for each of the one or more documents, wherein the user selects a document by placing a mark in the check-box associated with the document.

7. **(Currently Amended)** The method of claim 1, ~~further comprising the step of creating a table~~, wherein the step of creating the list further comprises ~~includes~~ the step of inserting the document summary data and the hyperlinks included in the list into one or more rows of ~~the a~~ table, and ~~wherein the step of storing the list in the system clipboard includes the step of storing~~ the table is stored in the system clipboard.

8. **(Currently Amended)** A computer system, comprising:
means for displaying a summary view of one or more documents to a user;
means for enabling the user to select one or more of the one or more documents listed in the summary view;
means for receiving ~~an indication~~ instructions from the user ~~that the user desires to have~~
~~the computer to~~ create a list of the one or more selected documents ~~selected by the user and to~~
store the list in a system clipboard; and
means for creating a the list of the one or more selected documents and storing the list in the system clipboard in response to receiving the ~~indication~~ instructions from the user, wherein
for each of the one or more selected documents ~~document selected by the user~~, the list includes document summary data pertaining to the selected document and a hyperlink to the selected document.

9. **(Currently Amended)** The system of claim 8, wherein the document summary data pertaining to a the selected document and the hyperlink to the selected document are combined so that the user can click on the document summary data itself to activate the hyperlink.

10. **(Original)** The system of claim 8, wherein the one or more documents are electronic mail messages.

11. **(Original)** The system of claim 8, wherein the one or more documents are documents that were found by an Internet search engine.

12. **(Original)** The system of claim 8, wherein the one or more documents are messages that are included in a discussion thread.

13. **(Currently Amended)** The system of claim 8, wherein the means for enabling the user to select one or more of the one or more documents comprises means for displaying a check-box for each of the one or more documents, wherein the user selects a document by placing a mark in the check-box associated with the document.

14. **(Currently Amended)** The system of claim 8, ~~further comprising means for creating a table~~, wherein means for creating the list ~~further comprises~~ includes means for inserting the document summary data and the hyperlinks included in the list into one or more rows of ~~the a~~ table, and ~~wherein the means for storing the list in the system clipboard includes means for storing the table is stored~~ in the system clipboard.

15. **(Currently Amended)** A computer readable medium having computer readable program code embodied therein, the computer readable program code comprising:

computer readable program code for displaying a summary view of one or more documents to a user;

computer readable program code that enables the user to select one or more of the one or more documents listed in the summary view;

computer readable program code for receiving ~~an indication~~ instructions from the user ~~that the user desires to have the computer to~~ create a list of the one or more selected documents ~~selected by the user and to~~ store the list in a system clipboard; and

computer readable program code for creating a the list of the one or more selected documents and storing the list in the system clipboard in response to receiving the ~~indication~~ instructions from the user, wherein

for each of the one or more selected documents ~~document selected by the user~~, the list includes document summary data pertaining to the selected document and a hyperlink to the selected document.

16. **(Currently Amended)** The computer readable medium of claim 15, wherein the document summary data pertaining to a the selected document and the hyperlink to the selected document are combined so that the user can click on the document summary data itself to activate the hyperlink.

17. **(Original)** The computer readable medium of claim 15, wherein the one or more documents are electronic mail messages.

18. **(Original)** The computer readable medium of claim 15, wherein the one or more documents are documents that were found by an Internet search engine.

19. **(Original)** The computer readable medium of claim 15, wherein the one or more documents are messages that are included in a discussion thread.

20. **(Currently Amended)** The computer readable medium of claim 15, wherein the computer readable program code for enabling the user to select one or more of the one or more documents comprises computer readable program code for displaying a check-box for each of the one or more documents, wherein the user selects a document by placing a mark in the check-box associated with the document.

21. **(Currently Amended)** The computer readable medium of claim 15, ~~further comprising computer readable program code for creating a table~~, wherein the computer readable program code for creating the list further comprises ~~includes~~ computer readable program code for inserting the document summary data and the hyperlinks included in the list into one or more rows of ~~the a~~ a table, and ~~wherein computer readable program code for storing the list in the~~

~~system clipboard includes computer readable program code for storing the table~~ is stored in the system clipboard.

22. **(Original)** A computer signal embodied in a carrier wave readable by a computing system and encoding a computer program of instructions for executing a computer process performing the method recited in claim 1.

23. **(New)** A computer implemented method, comprising the steps of:
displaying a summary view of one or more documents to a user;
enabling the user to select one or more of the one or more documents listed in the summary view; and
creating a list of the one or more selected documents and storing the list in a system clipboard in response to receiving instructions from the user, wherein
for each of the one or more selected documents, the list includes document summary data pertaining to the selected document and a hyperlink to the selected document, wherein the summary data pertaining to the selected document includes all summary data pertaining to the selected document that was included in the summary view.
